

Wednesday Challenge Form

Group Members: Tyler, Carlos, and Jess

Problem Statement: The challenge was to make a sketch up of an a capital E. Then your sketch-up would be collected and given to another group. You wouldn't know Who got your E and you wouldn't know who got your E. But once you had received someone Else's E you were to make it out of cardboard.

Approach: Our group first measured the Cardboard's depth so we could make our Sketch as accurate as possible. We then decided To make it 5in. Tall for no particular reason Other than that it seemed like a good number. We then made the top part of the E 3in the Middle 2in and the bottom 3in long. They were Each 1in wide leaving the two spaces 1 in as Well.

Solution: The group that won was group 1 and Group 6, 1 being the design group.

Lessons Learned: To make your designs simple and clear, make sure others can easily carry out your designs.
